NODUS carpet (2006)

cotton cord, handmade carpet, needlecraft technique

The NODUS carpet is a transposition of historical and ethnographical folk needlecraft art. Its rich ornamentation and elaborate weaves resulted from skilled processing of a simple material – thread. Changes introduced to the material, as well as the size and the structure shaping principle gave the object a new function and brought about a surprising aesthetic effect. The NODUS carpet is handmade from 1.5 km of cotton cord.
