

## **OMG!!! Ghosts really exist!!!**

"Łódź Design Festival is a unique event, which is why we decided to support it by producing a short [promotional film](#) It symbolically presents a change - the main subject of the festival this year - in the form of movement. With a wink, we tell the stories of objects that seem to be interested in design, which they perceive as something that moves them and sets them into motion. The Design Department of Change Integrated deals with design every day, so working for the festival is a great pleasure for us."

The material has been produced by [Change Integrated](#) as commissioned by Łódź Art Center.
