

## **must have vote - awarded products**

Yesterday, we presented awards for the winners of the **must have** vote.

**must have** is a vote in which a group of experts, including media representatives and representatives of important design centres in Poland and abroad, has selected the most interesting projects of Polish design.

The laureates of **must have** include big and well-known enterprises, and also small family and friends initiatives related to furniture, interior DESIGN, lighting, packaging and toys. In each case, the choices were determined by their innovativeness, functionality, ergonomics, quality and beauty of the Project.

Out of 150 nominated objects, 42 have been selected which we recommend as examples of a wise and conscious strategy of investing in design. Featured products are presented in tab Accompanying Exhibitions [must have](#)
